Profile

Born in 1979 in Sparti, Greece, chemist with MSc in Environmental Engineering and PhD in the field of Atmospheric Chemistry (2001, 2003 and 2007 respectively at the University of Crete, Greece). Associate Researcher at the National Observatory of Athens (NOA). Duties at NOA: Technical Manager–Main analyst in the Atmospheric Chemistry Laboratory (ACL), Station manager of the urban background ‘Thissio Air Monitoring Station’ (Athens, Greece) and responsible for the ‘Mobile Air Quality Monitoring Station’. Experience in ISO/IEC 17025:2005 application. EL is systematically involved in air quality research with emphasis on the monitoring of atmospheric aerosols and more specifically the determination of their chemical composition and the investigation of their optical properties. Her research interest also focuses on the non methane hydrocarbons. EL has great experience on ground based field measurements (active and passive sampling; fixed point and with mobile pollution monitoring units housed in vehicles) and operation of aerosol and organic compounds samplers, air pollution analyzers and automatic chromatographs. Her laboratory skills concern chromatography and spectroscopy applications (IC, HPLC, GC, GFAAS, Uv-Vis). She has participated in more than 30 research projects (PI in two of them), published 32 articles in international peer-reviewed journals (h-index 14, more than 800 citations) and also has 52 conference contributions (cf. lists below).
